

Main Navigation to appear on most pages
(not Home page):

- Home • Our Products/Shopping • Retail Store
- Main • Catalogs • Close Outs • Contact Us

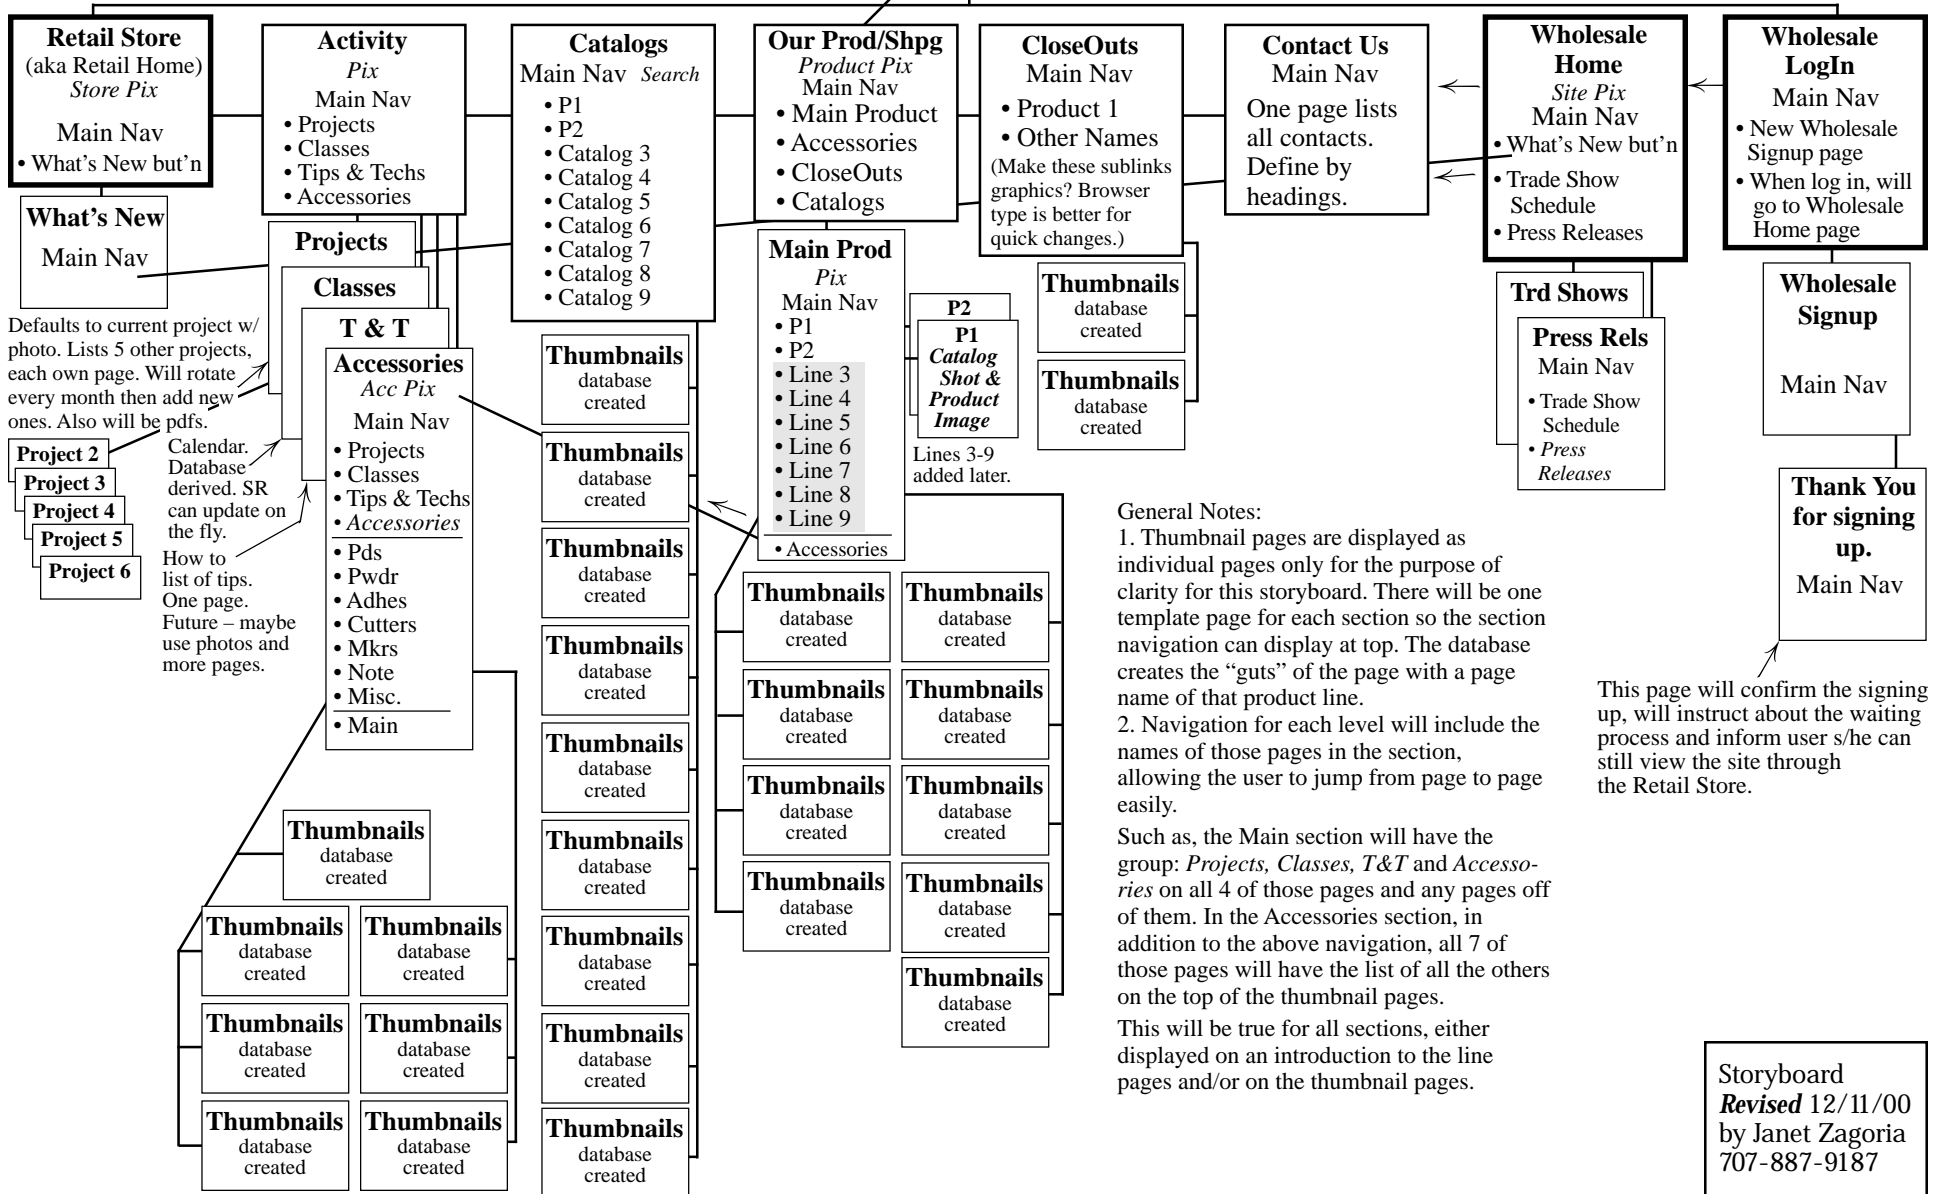

Home

- Our Products
- Retail Store
- Wholesale Log In

Image & Logo

Note Variations:

1. Home link will take user to either the Retail Store page or the Wholesale Home page
2. Catalogs thumbnail pages will reflect different prices if user comes from Retail Store or Wholesale Home
3. Shopping & Our Products/ one link.
4. Search appears throughout catalog pages

General Notes:

1. Thumbnail pages are displayed as individual pages only for the purpose of clarity for this storyboard. There will be one template page for each section so the section navigation can display at top. The database creates the "guts" of the page with a page name of that product line.
2. Navigation for each level will include the names of those pages in the section, allowing the user to jump from page to page easily.

Such as, the Main section will have the group: *Projects, Classes, T&T* and *Accessories* on all 4 of those pages and any pages off of them. In the *Accessories* section, in addition to the above navigation, all 7 of those pages will have the list of all the others on the top of the thumbnail pages.

This will be true for all sections, either displayed on an introduction to the line pages and/or on the thumbnail pages.

This page will confirm the signing up, will instruct about the waiting process and inform user s/he can still view the site through the Retail Store.
